## SKILLS

- JAVA
- C#
- Claude Code
- Web development
- GIT
- SQL
- Atlassian Suite
- AWS
- Octopus
- Docker
- Python

## LANGUAGES

- Spanish(Native)
- English (Fluent)

## PROFILE

Fascinated by computers since childhood, I turned a lifelong passion for technology into a 20+ year career as a software engineer. With deep experience in both backend and frontend development, I've helped build robust, scalable systems across fintech and enterprise sectors—always with curiosity, precision, and a drive for elegant solutions.

## WORK EXPERIENCE (ICELAND)

**Rapyd Europe** 2019 - 2026

Software developer (JAVA,C#, AngularJS, SQL)

I was hired by Korta, later acquired by Rapyd, then merging with Valitor. Several projects and roles in the period, both backend and frontend. Member of the Acquiring team, programming services, apps and APIs in C# to interact with card schemes or other departments.

**TEMPO Software** 2015 - 2018

Software developer (JAVA, React, Atlassian SDK)

Part of "Tempo Timesheets" development team, the most popular JIRA plugin. With more than 10000 customers, it is the de facto solution for time tracking in Atlassian JIRA.

Backend development of APIs, Cloud migration tasks, GDPR compliance. Focus on performance profiling, acceptance tests, improving building pipeline towards continuous delivery.

**Tern Systems** 2014 - 2015

Senior programmer (C++, JAVA)

Analysis and development of new features for ATM (Air Traffic Management) Software according to national and international safety and legal ATM regulations.

Analysis and development of new SOA for core company services from scratch, designing development process, system structure and technologies used to ensure code coverage, quality and testing.

**Aevi** 2013 - 2014

Web developer (HTML5, CSS3, jQuery, AngularJS)

Development of Aevi.is site according to the given design and the features desired by the CEO. AngularJS against REST.
